Election/Restrictions

1. Claims 15-26 and 35-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/22/04.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 5-7, 11-14, 27, 29-32, 41, and 43-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Romanato (5647150).

Romanato shows a shoe with an upper (3) an air permeable substrate (8 and/or 4), and web layer (11 and/or 3) as claimed.

In reference to claims 11-13, 31, 32, and 46-48, a comparison of the recited process with the prior art processes does NOT serve to resolve the issue concerning patentability of the product. In re Fessman, 489 F2d 742, 180 U.S.P.Q. 324 (CCPA 1974). Whether a product is patentable depends on whether it is known in the art or it is obvious, and is not governed by whether the process by which it is made is patentable. In re Klug, 333 F2d 905, 142 U.S.P.Q. 161 (CCPA 1964). In an ex parte case, product-by-process claims are not construed as being limited to the product formed by the

specific process recited. In re Hirao et al., 535 F2d 67, 190 U.S.P.Q. 15, see footnote 3 (CCPA 1976).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 28, and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Romanato in view of Shiomura (4785558) or Bartels (4232458).

Romanato shows a shoe substantially as claimed except for the exact substrate. Shiomura or Bartels teaches the use of a substrate which comprises two layers which are interconnected by fibers as a material for uppers of footwear. It would have been obvious to use a layered substrate as taught by either Shiomura or Bartels for the substrate in the shoe of Romanato to increase fit and comfort.

6. Claims 8-10, 33, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Romanato in view of Sass (3650051).

Romanato shows a shoe substantially as claimed except for ridges. Sass teaches providing ridges (26) on a lateral portion of a shoe. It would have been obvious to provide ridges as taught by Sass on the lateral portion of an upper in the shoe of Romanato to allow the shoe to be used for kicking a ball and to control the ball.

In reference to claim 9, since the ridges are on the web material they would inherently be located between the apertures as claimed.

Response to Arguments

7. Applicant's arguments filed 3/30/05 have been fully considered but they are not persuasive.

In response to applicants' arguments directed towards Romanato, Romanato clearly states that the sock (4) could be a variety of materials including textiles and woven and non-woven materials (note column 2 lines 33-50 and column 3 lines 21-41) and states that the embodiment/species shown in figure 6 comprising element 8 is merely one embodiment/composition for the sock fabric. Romanato also states that the thermoplastic (a polymeric material) material is molded onto and integrally connected to the sock layer and leaves openings (6) allowing the sock layer to be exposed (see column 2 lines 58 - column 3 line 20).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3728

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
